

Boost your Bottom Line

Welcome to the next generation

First we brought you a **revolution** in smart electronics: SATR. Now, we've re-invented live gaming again...

Announcing a limited edition, pre-launch sale. Invitation only.

*If you want to open, expand or upgrade **Your Battlefield Business**, this is for you.*

Battlefield Sports equipment has long been known for its ruggedness and simplicity, for a fail-safe system for having fun. We believe in practical solutions.

*We've tapped into **the needs of the gamer generation**. Our robust design will withstand heavy commercial use.*

Our systems are designed to maximize your profits and amplify game play.

Easy maintenance means a boost to your bottom-line.

Battlefield Sports presents...

Introducing... COBRA

The new COBRA is **built tough**. This design incorporates the very latest in industrial design and precision engineering. Choose your team - Blue, Green or Red. Add optional colored headbands to match.

Power-down the infrared for indoors, or for a maximum range of 660ft (200m).

The case is made from heavy duty MAKROLON 2858 polycarbonate resin which is on average 4mm thick even thicker in critical areas.

The design incorporates extensive use of silicone seals to make the Cobra **highly water resistant**.

All electronic parts except the reload button is mounted on the right shell making disassembly, maintenance and reassembly extremely easy

All surfaces are rounded making this unit highly suitable for both indoor and outdoor use. No protruding

barrel, in fact no barrel at all for maximum safety.

Blaze orange tip prominently placed at the front to ensure there is no danger of creating public alarm, Cobra can be used anywhere.

Includes the latest SATR electronics system, integrated head and barrel mounted infrared Optik sensors and Predator muzzle flash.

It has an extra weaver rail underslung for mounting a tactical torch Internally mounted (inside forward hand grip) antenna for maximum **robustness**. Precision engineered peep sight

with own red dot inside that never needs to be zeroed.

Weighs only 1.8kg (3.9lbs). Balanced between the forward & rear hand grips making it easy for anyone to use.

“The Cobra is better than the Scorpion. It is awesome. It is light. Easy to point & shoot. I love it!”
